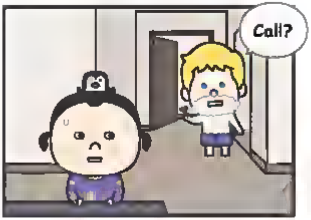
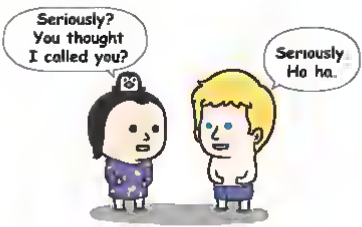
The evolution of a joke

Do you remember the story
from before?

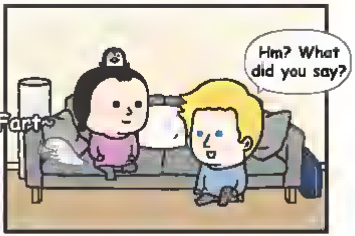
The story that...



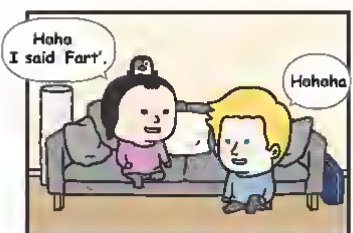
Mev thought that my fart sound was me calling him



Well, it started from this misunderstanding.

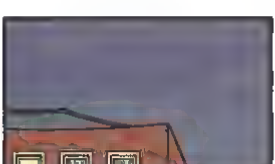


However, it finally became a common joke that Mev says.



I didn't mind too much about this joke, but..

as time has passed,
this joke has evolved.



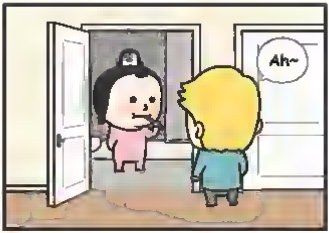
One day.

When I was in the bathroom
washing my face,...

... I farted.

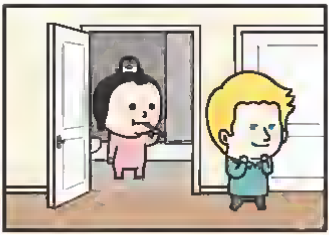
Of course, Mev didn't miss a chance to say this.

Then Mev answered back.



Ah~

I thought you opened your mouth, cause of the smell



I was worried how far this evolution would go...
